

SARGE'S IRONS · every damage number

Green vs. Tan · read out of the live game v29.25 on Nov 2, 2026 14:10 EST · the 5 irons he carries today, level 0 to 100 · measured in a lab fight on Chrome and WebKit

The one thing to know: At level 100 the SERVICE PISTOL lands the most on one man: 15.21 a blow, 173.5 a second. SABER 133.2 a second · THE CLAYMORE 49.9 a second · SNIPER RIFLE 35.5 a second · SHOTGUN 19.5 a second. The shotgun's 19.5 lands on EVERY man in its cone. A crit lands ×2 on every iron; his odds climb with the iron's level: 5 % at 10, 10 % at 15, 18 % at 100.

Every iron climbs on its own level (0 to 100). The first 10 levels pay in full, then the climb tapers: the ladder's units are 10 at level 10, 15.5 at 20, 21 at 50 and 24.7 at 100. PER SECOND is one man struck by Sarge alone at the listed rate (the fire clock carries a frame’s leftover since v29.24), crits apart (WITH CRITS adds his odds × the crit's size). Gear, crystals and lab parts come after the tables.

Three pieces land at the guns' own lines (the pistol, the shotgun, the sniper rifle), by distance or by target, so the table above cannot show them: SCOUT ARMOR +2 on a round past 84 px; LARSON'S BOOTS +7 on a round past 280 px; SHERIFF HAT +10 % into a rifleman inside 112 px. On the pistol a flat add lands after the crit; on the other irons it rides inside the blow, so a crit doubles it.

How this page was read

- The live game v29.25 (md5 93df2c28) booted in Chrome for Testing and in WebKit, a Boss Lab fight open: Sarge on each iron at every level 0 to 100, read with the game's own readers. The two reads are the same to the byte.
- Measured: Sarge alone before one tan rifleman held unkillable and silent; every blow caught as the HP he lost. Chrome 331/331 · WebKit 331/331 checks, no page error. Every blow equals the read; a crit equals the hit ×2.
- Since v29.24 the fire clock carries a frame's leftover between shots, so FIRED is LISTED on any screen (measured: the pistol 11.41 a second at level 100 for 11.41 listed).
- The outfit's lines: each piece worn alone on a bare Sarge, his stats read again on every iron at levels 0 and 100.
