

KING REX'S LAIR · EVERY UNIT, EVERY DIFFICULTY

What every dinosaur and King Rex does to your men on EASY, MEDIUM, HARD, MEGA and ULTRA MEGA, with every body's HP and head-count · read out of the live game v28.88 on Oct 31, 2026 20:10 · every damage number checked on the game's own machines (Chrome 131/131 · WebKit 131/131) · for Raziya

The one thing to know: since v28.65 the dinosaurs' damage **changes with difficulty**. The sprinter's bite, the pterodactyl's dive and the triceratops' charge hit for **15 · 30 · 45 · 60 · 65 HP** (EASY · MEDIUM · HARD · MEGA · ULTRA MEGA), the bruiser's slam for double, and the dilophosaurus burns **50 HP a second** (ULTRA MEGA 90). The stegosaurus' boulder and King Rex's bite are still a **KO**. The spitter and the king's fire, hop and tail are the same on every tier, except the king's fire on ULTRA MEGA (×10).

THE BOSS LAB fights King Rex at **LEVEL 20**: Sarge with the saber, the scout jeep and nine men at rank 20 (rifleman, M. gunner, bazooka, mortar, medic, flame, sweeper, radio man, grenadier). The spy (from 30) and the commando (from 50) are a tap away in THE PLATOON. Every "level 20" number on this page is that army.

live since	when	card	what it does in this fight
v28.65	Oct 30 19:39	**CARD-LRB · THE LAIR'S DINOS**	The sprinter's bite, the pterodactyl's dive and the triceratops' charge stop being KOs: they hit for 15 · 30 · 45 · 60 · 65 HP on EASY · MEDIUM · HARD · MEGA · ULTRA MEGA. The bruiser's slam hits for double (30 · 60 · 90 · 120 · 130 HP). The dilophosaurus burns 50 HP a second on MEDIUM, HARD and MEGA and 90 on ULTRA MEGA (EASY as before). The boulder and King Rex's bite stay KOs.
v28.65	Oct 30 19:39	**CARD-LRB · HP ×3**	Triceratops 12 → 36 HP and dilophosaurus 7 → 21 HP at the base, so every tier's body is three times as tough (the ULTRA MEGA guard's trikes 570 HP).
v28.65	Oct 30 19:39	**CARD-LRB · ONE HP NUMBER**	Your man's HP is the number on his unit sheet in every mode (the same one the battleground uses). The older hits that count in bar hits (the spitter, the king's fire, his hop and tail) now land a little lighter on tough men: 90 % + 10 % × bar ÷ HP of a hit.
v28.65	Oct 30 19:39	**CARD-LRB · THE CLUTCH**	Every clutch (the eruption's nests, the last eruption) lands one egg every 0.2 s a nest, side by side, each still hatching on its old moment.

live since	when	card	what it does in this fight
v28.65 + v28.74	Oct 30 · Oct 31 00:11	**CARD-LRB + CARD-HP3 · TENTH-RANK HP**	Extra HP every 10 ranks: M. gunner +1, bazooka +5, grenadier +4, flame +6, commando +5, spy +1. At level 20 the flame and the commando have 31 HP and now live through a MEDIUM bite with 1 HP (no class did on Oct 30).
v28.68	Oct 30 23:31	**CARD-BRB · THE BOMBER**	Your bomber flies in every boss fight now and aims at the thickest knot of dinos (or the king). Price and damage unchanged.
—	—	**UNCHANGED**	King Rex (his bars, clock, reach, wedge, hop, tail, charge, eruption), every wave sheet and head-count, the spitter, the boulder, the egg's HP, the toy box. Checked: every one of those numbers reads the same as yesterday's page.

How a hit is counted

Your men carry **HP**: the number on their unit sheet, the same in every mode (the flame has 31 at level 20, the rifleman 14). There are three kinds of hit in this fight:

- **HP hits** (the sprinter, the pterodactyl, the triceratops, the bruiser, the dilophosaurus): a hit of D takes D off his HP. A fresh man with D HP or less is KO'd by one hit.
- **KO hits** (the boulder, King Rex's bite): out in one hit whatever his HP.
- **Bar hits** (the spitter's glob, the king's fire, his hop, his tail, the dilophosaurus on EASY): every man's health bar is also cut into a few *bar hits* (5 to 7 for a level-20 man, 8 at rank 100, more for the saber Sarge and the heroes). One bar hit takes about a sixth of a level-20 man's HP: 2.2 HP of a rifleman's 14, 4.8 of a flame's 31. Since v28.65 a bar hit lands a little lighter on tough men (90 % + 10 % × bar ÷ HP).

A man who takes no hit for 4 s mends. Saves still roll on every hit: a jetting or dragged man cannot be touched, a cloak hides the spy from the triceratops and the sprinter, the pet shield, the deflect dome, Sarge's and the Commander's absorbs, the saber's block and the dodges. A vehicle has 6 hits of hull: every HP or KO strike takes one of them, the hop and the tail sweep pass under it, and the king's fire or tail lash wrecks it in one go.

HP = the man's sheet HP at rank 20 (a hero: his own HP pool, which a dino's HP hit comes off). The bite / dive / charge and the slam columns are the HP tables above; the dilo column counts beats (2 a breath, a beat every 0.5 s); the spit glob is 2 bar hits, the king's fire 10 a beat (100 on ULTRA MEGA), the hop 1, the tail lash 10. The tail sweep (1 bar hit, MEGA and ULTRA MEGA, only after a saber hit) reads like the hop.

The level a man first survives one hit

The lowest rank at which a fresh man lives through one hit (his sheet HP is more than the hit). **Green** = he already does at the lab's level 20; — = not even at rank 100.

At level 20 one beat KOs every man of the army (on a rifleman a beat is worth 22 HP; he has 14); the saber Sarge (bar of 11) lives through one beat and the Claymore Sarge (22) through two; a hero takes 10 of his bar of 37 to 95. ULTRA MEGA: 100 a beat, a KO for everyone at level 20, heroes too. The first waves stream on a drum: 10 s grace, then about 15 s apart. The court wave waits for a swept field; the eruption waits for the king at his 5 % mark. The angry king leaps back 10 s into the eruption; the clutch lands at 7 s and hatches 7.2 s later.

How this was read and checked

The live client v28.88 (index.html md5 1de0910be46cda954034c14925273a12, the same bytes the Big Mac deployed at 17:37 EDT today) was opened headless and read with the game's own functions: every table, every tier's wave sheet, every body as it spawns, every man's HP at every rank. Then each damage number was **measured on the real machines** in a BOSS LAB fight on every tier: the sprinter, pterodactyl, triceratops and bruiser striking level-20 riflemen, M. gunners, flames and medics; the dilophosaurus' breath; a spitter's glob; a stegosaurus' boulder on a rank-100 M. gunner; King Rex's bite (his real sprint), breath, hop landing, tail lash and tail sweep. Chrome 131/131 · WebKit 131/131 checks passed, zero page errors, and the two engines read every number the same.
