

THE ICE CASTLE · KING YETI · EVERY UNIT, EVERY DIFFICULTY

What every yeti, snowman, sergeant, turret and King Yeti does to your men on EASY, MEDIUM, HARD, MEGA and ULTRA MEGA, with every body's HP and head-count · read out of the live game v29.45 on Nov 2, 2026 19:25 EST · every damage number checked on the game's own machines (Chrome 306/306 · WebKit 306/306) · for Raziya

The one thing to know: in the Ice Castle **almost every enemy hit is a KO, whatever a man's HP**: the yetis' pounce, Sergeant Cold's big snowball and sprint, Sergeant Snowman's rolling ball on a light man, and every move King Yeti has (snowball, sword, seize, blue wind, leap). Only three hits take part of a man: the snowman's thrown ball (**2 bar hits**, MEGA and ULTRA MEGA ×1.2, landing as 1 · 1.2), **THEIR turret** since v28.79 (**0.625 · 0.75 · 0.875 · 1.2 HP a round** on EASY · MEDIUM · HARD · MEGA, a fifth on a heavy; ULTRA MEGA still a KO), and Sergeant Snowman's ball on a heavy (**25 % of his bar**, MEGA 30 %; ULTRA MEGA a KO). **Since v29.17 THE DAMPER lands every bar hit and HP hit an enemy lands on your men at 50 %** (50 % off, in the campaign and every boss fight; the numbers here carry it): a KO is not a hit, so every KO strike is a KO as before. Difficulty changes the bodies, the head-counts and the clocks; a KO hit is a KO on every tier. MEGA and ULTRA MEGA add +20 % to every bar hit, double the snow's slow, and bring the purple leaps.

THE BOSS LAB fights King Yeti at **LEVEL 25**: Sarge with the saber, the scout jeep and nine men at rank 25 (rifleman, M. gunner, bazooka, mortar, medic, flame, sweeper, radio man, grenadier). The commando and the spy are a tap away in THE PLATOON. Every "level 25" number on this page is that army.

live since	when	card	what it does in this fight
v29.45	Nov 2	**CARD-UMH · ULTRA MEGA HP**	ULTRA MEGA: the three bosses' bars are flat for any party: Sergeant Cold 9,000, Sergeant Snowman 10,000, King Yeti 17,000 with one commander and with ten (the +3,000 with 3 commanders went with it). Sergeant Snowman hops toward your men there (the first 12 s after he steps on, then every 24 s; the landing is a KO for the men within 48 px; not in this proof). EASY to MEGA keep the party law.
v29.37 · v29.40 · v29.41	Nov 2	**CARD-RXT (+ CARD-PDT) · CARD-FLT · CARD-DHP · READ AGAIN**	Read again on v29.45 after the day's cards: the three bosses' bars for one commander on EASY · MEDIUM · HARD follow the designers' time-to-kill chart (v29.37: King Yeti 2,029 · 2,705 · 4,058, the sergeants in step) and on MEGA the player-damage-threshold pass's number (King Yeti 4,860); the men's tenth-rank HP moved (v29.40: the flame's rungs through level 50 tripled; v29.41: the bazooka's and commando's doubled): at level 25 the flame 55 HP, the bazooka 33, the commando 41. WHO SURVIVES and THE LEVEL A MAN FIRST SURVIVES count it.

live since	when	card	what it does in this fight
v29.17	Nov 1 23:53	**CARD-DMP · THE DAMPER**	Every enemy blow on your men lands at 50 % in the campaign and the boss fights: 50 % off every bar hit and HP hit, one row in THE BOSS LAB's RULES (THE DAMPER, a cell a tier). In the castle three hits take part of a man and all three land at 50 %: the snowman's ball (a level-25 rifleman takes 0.94 of his 6 bar hits on EASY, was 1.89), THEIR turret's round (0.625 HP on EASY, was 1.25: a lone level-25 rifleman now falls in 3.6 s, a flame in 75.5 s, measured) and Sergeant Snowman's ball on a heavy (25 % of his bar, was 50 %: 4 volleys in a row KO him). A KO is not a hit: every KO strike in this fight lands as before.
v29.11	Nov 1 23:19	**CARD-KYT · KING YETI'S TURRETS**	EASY to MEGA: the home post on the road by your toy box starts neutral like the two in the middle (it started OURS); a side that holds its ring alone 3 s takes it. A boss alone in a ring now takes a post like any yeti (the ring skipped every boss). The castle's posts lost their flag pole.
v28.79	Oct 31 13:32	**CARD-KYF · KING YETI'S FIELD**	EASY to MEGA: a third turret, OURS from the whistle, on the road by your toy box. Both sides' guns fire a 3-round burst every 0.5 s. THEIR gun stops being a KO: a round takes 1.25 · 1.5 · 1.75 · 2 HP (E · M · H · G, MEGA ×1.2 on top), a fifth of that on the bazooka, grenadier, flame and commando. OUR gun does half to the big yeti, the sergeants and the king. Sergeant Snowman's ball takes half a heavy's bar instead of a KO. A rolling snowball sets off your charges. ULTRA MEGA is not in it.
v28.81	Oct 31 14:20	**CARD-KYF ROUND 2 · THE FULL BLAST**	A charge a snowball sets off blasts your own men too, the campaign's own friendly fire (Wyatt: "Full blast with friendly fire"). Measured: a rifleman 65 px from the charge was KO'd on every tier.
v28.74	Oct 31 00:11	**CARD-HP3 · THE HEAVIES**	+3 HP every tenth rank for the bazooka, grenadier, flame and commando. At level 25: bazooka 33, grenadier 22, flame 55, commando 41 HP. THEIR turret reads this HP; the KO strikes do not care.
v28.68	Oct 30 23:31	**CARD-BRB · THE BOMBER**	Your bomber flies in every boss fight now, the castle included, and aims at the thickest knot of yetis (or the boss).
v28.65	Oct 30 19:39	**CARD-LRB · ONE HP NUMBER**	Your man's HP is the number on his unit sheet. A snowman's ball still counts in bar hits, but lands a little lighter on tough men: 90 % + 10 % × bar ÷ HP (a level-25 flame takes 1.82 of 2, a rifleman 1.89; before the damper).
v28.46	Oct 30 12:57	**CARD-BLP · THE BOSS LAB'S STOCK ARMY**	The lab fights King Yeti with its own army at LEVEL 25 (BLB_STOCK_LV): the one this page reads.
read	Oct 31 12:22	**CARD-KYP · HIS FORCE POWERS (a read, no change)**	King Yeti's seize and blue wind are ON at every tier. The fight hides them (half his seizes find nobody within 300 px, his snowball often KOs the man he holds, his sword swings at air between 64 and 130 px). Its fixes wait on Wyatt's KYP-Q1..Q4.
—	—	**UNCHANGED SINCE THEN**	The yetis' pounce, every KO strike of both sergeants and of King Yeti, King Yeti's bars, the units' bodies, the wave sheets and head-counts, the ULTRA MEGA night's rows.

How a hit is counted

Your men carry **HP**: the number on their unit sheet (the flame has 55 at level 25, the rifleman 14). Their health bar is also cut into a few **bar hits** (6 for most level-25 men, 5 for the medic and spy, 7 for the commando, 11 for the saber Sarge). Three kinds of hit in this fight:

- **KO hits** (the pounce, the big snowballs, the sprint, the leaps, King Yeti's sword, seize and wind, Sergeant Snowman's ball on a light man, THEIR turret on ULTRA MEGA): out in one hit whatever his HP.
- **Bar hits** (the snowman's thrown ball): 2 bar hits a ball, ×1.2 on MEGA and ULTRA MEGA, ×1.2 on the M. gunner, landing at 50 % (the damper). Since v28.65 a bar hit lands 90 % + 10 % × bar ÷ HP, so a level-25 rifleman takes 0.94 of his 6 (2.2 HP of 14). Sergeant Snowman's ball on a heavy is 50 % of his bar at the damper's 50 %: 25 %, MEGA 30 % (bazooka · grenadier · flame · commando).
- **HP hits** (THEIR turret, EASY to MEGA): a round of D lands D × 50 % (the damper) off his HP (D = 1.25 · 1.5 · 1.75 · 2, MEGA ×1.2; a heavy ×0.2): 0.625 · 0.75 · 0.875 · 1.2 HP a round on a light man. A lone man takes all 3 rounds of a burst, a burst every 0.5 s.

A man who takes no hit for 4 s mends. Saves still roll on every hit: a jetting, dropping or dragged man cannot be touched, the pet shield, the deflect dome, the absorbs, and **the saber Sarge's block turns a KO 50 % of the time at rank 25** (measured: 15, 21, 15, 21, 17 of 40 pounces on the five tiers). A charged commando catches a big snowball or a rolling ball and sends it back. The hero kings (King Yeti, King Rex) bounce every thrown and rolling snowball.

THEIR TURRET counts rounds (3 a burst, a burst every 0.5 s on a lone man: 9 rounds ≈ 1 s, 30 rounds ≈ 5 s). SGT SNOWMAN'S BALL: a heavy stands a ball (25 % of his bar, MEGA 30 %) and the rest of that volley rolls through him; 4 volleys in a row KO him. A lone snowman, measured (no medic, both engines): a level-25 man fell in 13–43 s on EASY to HARD and 12–52 s on MEGA and ULTRA MEGA, longer than the balls in a row suggest: when two of his balls land more than 4 s apart the man mends one bar hit between them, about one ball's weight at the damper's 50 %. EVERY OTHER STRIKE = the pounce, the big snowballs, the sprint, the leaps and King Yeti's sword, seize and wind. * The Claymore Sarge's own block can eat a KO whole (not measured here).

Read from the game's own wave sheet with 1, 2, 3, 4, 5 and 10 commanders in the fight. ULTRA MEGA is flat for any party since v29.45: the three bars the same at every size.

The turrets and your mines

EASY to MEGA: three posts. Two in the middle of the field (north and south) start neutral; the home post on the road by your toy box starts neutral too (since v29.11; it started OURS before). A side that holds a post's 110 px ring alone for 3 s takes it (a boss alone in a ring takes it like any yeti since v29.11). ULTRA MEGA has the two middle posts and the old guns.

A burst = 3 rounds of 4 HP spread over the nearest foes within 400 px (a lone foe takes all three). The big ones (big yeti, the sergeants, the king) take half on EASY to MEGA.

Your mines (EASY to MEGA): Sergeant Snowman's rolling ball sets off every armed charge of yours it reaches (52 px a sapper's charge, more for a big one), the charge's own blast hits the yetis **and your own men** (the full blast since v28.81), and the ball bursts. Measured on every tier: the charge went off, the ball burst, and a rifleman 65 px from the charge was KO'd. On ULTRA MEGA the ball rolls over your charges.

How this was read and checked

HEAD's client v29.45 (index.html md5 45c6dc2110aca9c45afcf11e69b2768d, read from the repository as HEAD's own bytes) was opened headless and read with the game's own functions: every table, every tier's wave sheet, every man's HP and bar at every rank, the bosses' bars for 1 to 10 commanders, and the damper by name and inside a BOSS LAB fight on every tier (a blow on your men lands at 50 %). Then each hit was **measured on the real machines** in a BOSS LAB fight on every tier, the bosses born through the castle's own wave door so every tier stamp rides: the munchkin's and the big yeti's pounce and the snowman's ball on level-25 riflemen, M. gunners, bazookas, flames, medics, grenadiers and the saber Sarge (and 40 pounces on the Sarge for his block); Sergeant Cold's big snowball, sprint and purple leap; Sergeant Snowman's volley on a light man and two heavies and on a charge; King Yeti's snowball, sword (3 men), the swing at air, the seize (and the seize at nobody), the blue wind (4 men at 100 to 320 px), both summons and the leap; THEIR turret on each man and the jeep, OUR turret on every foe; the six heroes; every body as the tier bears it. Chrome 306/306 · WebKit 306/306 checks passed, zero page errors, and the two engines read every number the same.
