

THE ICE CAVES · THE FEROCIOUS YETI · EVERY UNIT, EVERY DIFFICULTY

What every cave yeti, spearman, fisher, dark yeti swordsman and THE FEROCIOUS YETI does to your men on EASY, MEDIUM, HARD and MEGA, with every body's HP and head-count · read out of the live game v29.45 on Nov 2, 2026 20:41 EST · every damage number checked on the game's own machines (Chrome 381/381 · WebKit 381/381) · for Raziya

The one thing to know: in the caves **three blows kill a lesser foot soldier whatever his HP**: a swordsman's cut, THE FEROCIOUS YETI's landing (THE CHOMP, 58 px wide) and the falling ice (which kills **everyone** under it: Sarge of every iron, the jeep, the tank, every hero). **Since v29.13 the flame, the bazooka and the commando are spared** by the cut and THE CHOMP: they take the bar hits instead. Every other blow is **bar hits** off the one bar every man carries (8.8 for the men, 7.5 for the medic, 12 for the saber Sarge) × the share × the damper: a cave yeti's landing, a spearman's charge, a fisher's fish and the stomp 1 · 1 · 2 · 2 by tier, the chase's run 2, a cut on Sarge or the medic 3, THE CHOMP on them 2 · 3 · 4 · 4. **And the heavies are heavy here** (since v29.13): on top of the caves' bar (×1.25 · 1.2 · 1.15 · 1.1 by tier for every man but Sarge) the flame, the bazooka and the commando carry ×1.5 · 1.5 · 1.4 · 1.3 more, so on EASY a flame (99 HP) stands 29 landings to a rifleman's 19, and every blow lands at 50 % of its size (the damper). **King Yeti and King Rex are the exception the other way**: every cave creature's blow bounces off their hide (measured: nothing lands but the ice). Difficulty changes the bar hits (1 → 2 from HARD), THE CHOMP (2 · 3 · 4 · 4), the bodies (×1 · 1.5 · 2.2 · 2.64), the head-counts, his bar (2,312 · 3,083 · 4,624 · 5,670) and the lab's level.

THE BOSS LAB fights the caves with its stock army at **LEVEL 45 on EASY, 47 on MEDIUM, 48 on HARD and 50 on MEGA**: Sarge with the saber, the jeep, the tank and the dogfighter (the bomber on MEGA), the jet pack on, and eight men at that rank (rifleman, M. gunner, bazooka, mortar, medic, flame, sweeper, radio man; MEGA swaps the radio man for the bomber). The grenadier, the commando and the spy are a tap away in THE PLATOON. Every "level" number on this page is that army at that tier's level. At levels 45 to 48 the men's HP is the same number (the ladder steps every tenth level); 50 is a step up.

What changed recently (since Sep 22)

live since	when	card	what it does in this fight
v29.41	Nov 2	**CARD-DHP · DOUBLE HP, THE SHOTGUN**	The bazooka's and the commando's tenth-rank HP bonus doubled (+10 HP a rung) and shotgun Sarge wears +20 HP per ten shotgun ranks while the shotgun is in his hands. At level 45 to 48: the bazooka was 40 HP on v29.24, now **60**; the commando 49 → **69**; the shotgun Sarge 32 → **112**. At 50: 49 → 74 · 58 → 83 · 35 → 135. A bar hit lands a hair lighter on them (the share); the three kill doors do not care.

live since	when	card	what it does in this fight
v29.40	Nov 2	**CARD-FLT · THE FLAME'S RUNGS TRIPLED**	The flame's +6 HP every tenth rank pays three times that through level 50: at level 45 to 48 the flame was 51 HP on v29.24, now **99**; at 50: 61 → 121. He stands the bar-hit blows longer (WHO SURVIVES below); the cut and THE CHOMP already spare him since v29.13; the ice still kills.
v29.37	Nov 2	**CARD-RXT · THE DESIGNERS' TIME-TO-KILL CHART**	His bar for one commander on EASY · MEDIUM · HARD is the chart's cell: was 1,080 · 1,890 · 1,881 HP on v29.24, now **2,312 · 3,083 · 4,624**. The wrap writes the sheet row's multiplier over the base at the fight's birth (×2.4 · 2.8 · 1.9 → ×5.1378 · 4.5674 · 4.6707; the dial under it unchanged), so a party bar lands within 3 HP of solo × (1 + 0.9 a commander past the first): with two 2,052 · 3,590 · 3,574 → 4,393 · 5,855 · 8,786. MEGA's bar is the threshold pass's (the row below).
v29.30	Nov 2	**CARD-PDT · THE PLAYER-DAMAGE-THRESHOLD PASS**	His bar for one commander on MEGA is the pass's table number: was 3,089 HP on v29.24, now **5,670** (the row runs at ×4.7724 over the base, the dial ×2.6 under it); with two 5,868 → 10,771. Its EASY · MEDIUM · HARD cells gave way to the chart the same day (the row above).
v29.17	Nov 1	**CARD-DMP · THE DAMPER**	Every enemy blow on your men lands at 50 % of its size in the campaign and every boss fight (the Boss Lab too): a man stands about twice the bar-hit blows of the page before it; a kill blow is still a kill.
v29.13	Nov 1	**CARD-ICP · THE PACING PASS**	The cave creatures step ×0.7 · 0.75 · 0.8 · 0.85 and THE FEROCIOUS YETI ×0.75 · 0.8 · 0.85 · 0.9 by tier; every bar of your side but Sarge ×1.25 · 1.2 · 1.15 · 1.1, the flame's, the bazooka's and the commando's ×1.5 · 1.5 · 1.4 · 1.3 more; the swordsman's cut and THE CHOMP spare those three (they take the bar hits); the falling ice still kills.
v29.00	Nov 1	**CARD-ICN-G3 · THE HOLES ARE REAL**	A hole's rim steers a man's step, a man pushed across a rim falls in (the pit law), and the hand is refused at a rim.
v28.99	Nov 1	**CARD-ICN4 · THE CAVES' PURSE**	A cave creature pays its bounty × 4 · 3.6 · 3.2 · 3 dog tags by tier (a cave yeti 40 · 36 · 32 · 30, a swordsman 120 · 108 · 96 · 90; measured as born); a man THE CAVE-IN's band kills gets ×1 · 1 · 0.75 · 0.5 of his price back in all.
v28.98	Nov 1	**CARD-ICN-G1 · THE HOLES IN VIEW**	The caves pan down for the hand like the flat rugs, so the bottom row of holes clears the troop tray on a phone.
v28.97	Nov 1	**CARD-ICN-G2 · THE QUIET START**	The first burst at 8 · 6 · 5 · 4 s by tier (was 2.5 everywhere), the three holes nearest the toy box asleep till 25 · 20 · 15 · 10 s (never past his arrival), and the lab forgets the speed dial on a reload.
v28.74	Oct 31	**CARD-HP3 · THE HEAVIES**	+3 HP every tenth rank for the bazooka, grenadier, flame and commando. The grenadier at level 45 to 48: 37 HP; at 50: 45. The bazooka's, the flame's and the commando's rungs are re-priced since (the Nov 2 rows above). A bar hit lands a hair lighter on them (the share); the three kill doors do not care.
v28.65	Oct 30	**CARD-LRB · ONE HP NUMBER**	Your man's HP is the number on his unit sheet; a bar hit lands 90 % + 10 % × bar ÷ HP of itself (a level-45 flame takes 0.46 of a cave yeti's 1, a rifleman 0.47).
v28.46	Oct 30	**CARD-BLP · THE BOSS LAB'S STOCK ARMY**	The lab fights the caves with its own army at LEVEL 45 · 47 · 48 · 50 (the lab's level sheet for the caves reads 45–50, spread over the four tiers): the one this page reads.

How a hit is counted

Your men carry **HP**: the number on their unit sheet (a level-45 flame has 99, a rifleman 22; at level 50: 121 and 26). Their health bar is also cut into a few **bar hits** on EASY 8.8 for most men, 7.5 for the medic and the spy, 13.1 for the flame and the bazooka, 15 for the commando, 12 for the saber Sarge, 23 for the Claymore Sarge; every man's but Sarge's ×1.25 · 1.2 · 1.15 · 1.1 by tier in the caves). Two kinds of blow in this fight:

- **Kill blows** (a swordsman's cut and THE CHOMP on a lesser foot soldier: rifleman, M. gunner, mortar, grenadier, sweeper, radio man, spy; the falling ice on anyone; since v29.13 the flame, the bazooka and the commando are spared by the cut and THE CHOMP and take their bar hits): out in one, whatever his HP. Only a wall turns them: a pet's shield, Francis's block, the commando's roof, the blue wall or the dome turns the blow into bar hits (1 · 1 · 2 · 2 for the cut, 3 for a shard); the champion's grace once a life.
- **Bar hits** (a landing, a charge, a fish, the stomp: 1 · 1 · 2 · 2; the run: 2; a cut on Sarge, the medic, a spared heavy, a machine or a hero: 3; THE CHOMP on them: 2 · 3 · 4 · 4): since v28.65 a bar hit lands 90 % + 10 % × bar ÷ HP, and since v29.17 **THE DAMPER** lets 50 % of every enemy blow land in the campaign and every boss

fight (a kill blow is not dampened), so a level-45 rifleman takes 0.47 of his 8.8 from a cave yeti's landing (1.2 HP of 22). A hero's share is 1. A man who takes no hit for 4 s mends one bar hit, and again every 4 s.

Saves still roll on every bar hit: a jetting, dropping or dragged man cannot be touched, the pet shield, the deflect dome, the absorbs, and **the saber Sarge's block turns a landing, a charge, a fish, a cut or THE CHOMP about half the time** (measured: 3–9 of 10 landings, 3–6 of 10 cuts and 3–7 of 10 chomps turned over the four tiers and both engines). **King Yeti's and King Rex's hide turns every blow of a cave creature** (a thrown-snow law: the whole cave family counts as snow), the falling ice alone takes them. The Claymore Sarge's counted block and the riot plate keep their say. Nothing turns the ice but a shield.

A number = the bar hits one blow lands on your man before his share: the number shipped × the damper (50 % since v29.17; the since column names the number shipped). share = 90 % + 10 % × the man's bar hits ÷ his HP (CARD-LRB). The caves' dials sit in THE BOSS LAB's RULES under THE ICE CAVES (35 cells: his bar, his strike clock, his chomp, the chase's pace, the dark, the hold, the eyes, the calls, the bursts, a landing, the storm, the bounce chain, the swarms, the cave-in, the march, the swordsmen, a cut): a typed cell is what the next lab fight uses.

LANDINGS · CHARGES · FISH · STOMPS: the same 1 · 1 · 2 · 2 bar hits × the share, by the sum (a man mends one bar hit for every 4 s left alone, so a lone cave yeti on his 1 s dance and 1.5–3 s in the hole often needs one more). RUN: the chase's 2 bar hits every 0.5 s under him, inside the mend. THE CHOMP and THE CUT: a foot soldier falls to one (the kill door); Sarge, the medic and a hero take 2 · 3 · 4 · 4 and 3 bar hits × the share. The saber Sarge's cells: his blade turns about half of every bar-hit blow (measured; the kill doors are not his to turn: he is not a foot soldier). THE ICE: one shard, anyone (the commando's shield breaks the first over him).

A hero's share is 1 (his HP is not on the unit sheet), so a hero takes the whole bar hit: a landing 1 · 1 · 2 · 2, a cut 3, THE CHOMP 2 · 3 · 4 · 4, the run 2, the stomp 1 · 1 · 2 · 2. **King Yeti and King Rex take none of them**: every cave creature is thrown snow to their hide, and it bounces (measured on every tier, both engines). The falling ice kills every hero in one (measured, all six, every tier).

The level a man first survives

For the bar-hit blows. The three kill doors have no such level: no rank survives a cut or THE CHOMP as a lesser foot soldier, and nobody survives the ice (the flame, the bazooka and the commando are spared since v29.13 and have their levels). **Green** = he already does at the lab's EASY level 45; — = not even at rank 100.

Read from the game's own HP and bar ladders at every rank 0–100 (the tenth-rank extras included; no gifts, soul or gear), by the sum of the blows with no mend between. "Two-bar-hit blows" = MEGA's landing, charge, fish or stomp and the run on any tier: 2 × the share each. Sarge's rows read the iron at the same rank.

move	EASY	MEDIUM	HARD	MEGA	how it works
THE ARRIVAL	25 s	25 s	25 s	25 s	He shows himself in the far mouth 25 s into the fight (two eyes in the black, a roar), waits 1.6 s, then vanishes into the holes and the hunt begins. Before him the holes have already fielded the cave yetis (five bursts from 8 · 6 · 5 · 4 s by tier), the spearmen (16 · 14 · 13 · 12 s), the fishers (21.5 · 19.5 · 18.5 · 17.5 s) and the swordsmen (22 · 20 · 19 · 18 s); the three holes nearest the toy box stay shut till 25 · 20 · 15 · 10 s.
THE HUNT	1 × the dark · the eyes 0.6 s	0.9 × the dark · the eyes 0.45 s	0.8 × the dark · the eyes 0.35 s	0.7 × the dark · the eyes 0.25 s	ACT I: between strikes he is in the dark (the tier's share of the dark; HARD and MEGA also hold every man within 300 px of his roar for 1 s). Two ice-blue eyes light in the hole he will come out of for the tier's warn, then he bounds out of the hole nearest the man deepest in your line (every third strike out of THE BACK HOLE behind you), a 0.55 s flight that tracks the man's feet, and lands. The landing is one of three on a seven-strike rota: THE RAMPAGE 4 of 7, THE STOMP 2, a single CHOMP 1.

move	EASY	MEDIUM	HARD	MEGA	how it works
THE CHOMP	**KO** · 2 bar hits	**KO** · 3 bar hits	**KO** · 4 bar hits	**KO** · 4 bar hits	His landing, 58 px wide: **every lesser foot soldier under it is KO'd** whatever his HP (the kill door; measured on every tier: the rifleman, the M. gunner and the grenadier fell; the flame, the bazooka and the commando, spared since v29.13, took the bar hits). The heavies, Sarge, the medic, the jeep, the tank and a hero take 2 · 3 · 4 · 4 bar hits × the share × the damper and the bowl-over (80 px) — measured: the saber Sarge turned 3–7 of 10, the pistol and the Claymore Sarge took the bar hits, King Yeti and King Rex turned every one (their hide). A man under him when he lands is the whole law; the chomp itself is the bite over the man he downed (THE DANCE).
THE RAMPAGE	3 bounds	4 bounds	5 bounds	6 bounds	Four strikes of seven: the landing above, then 2 · 3 · 4 · 5 more bounds in a chain, each at the nearest man within 420 px (0.42 s a bound), each landing **KO to the foot soldiers under it** and one bar hit lighter for the rest (1 · 2 · 3 · 3; measured: the medic took 1 on EASY under a rampage's landing, the rifleman beside him fell).
THE STOMP	1 bar hits · 150 px	1 bar hits · 150 px	2 bar hits · 150 px	2 bar hits · 150 px	Two strikes of seven: he lands, rises 0.35 s (the amber ring: the tell), and the shockwave takes 1 · 1 · 2 · 2 bar hits × the share off every man within 150 px and bowls him 130 px (measured on every man at 60 px; a shorter jig after).
THE FROST BREATH	off	off	off	off	In the file, off the rota: the cone (330 px, 1 bar hit and a freeze of 0.7 · 0.9 · 1.3 · 1.6 s) is never dealt in a fight today (Wyatt 9/26: the animation was never finished). Not measured; nothing to balance.
THE FALLING ICE	every 7 s · 2 clusters	every 6 s · 3 clusters	every 12 s · 2 clusters	every 12 s · 2 clusters	From his arrival, every 7 · 6 · 12 · 12 s a volley of 2 · 3 · 2 · 2 clusters of three shadows, each cluster aimed at a living man on his feet (its first shadow on him). A shadow grows 1.8 s (the premiere's 2.2 s), then the shard lands and **kills every unit within 40 px**: Sarge of every iron, the jeep and the tank included (measured on every tier, both engines: the rifleman fell 1 s after the shadow). A pet's shield, Francis's block or the blue wall turns a shard into 3 bar hits; the champion's grace once a life. **A commando's shield breaks the first shard** over him or over any man within 120 px of him (his one charge; measured: the rifleman in his circle stood, the commando stood, the shield spent; a second shard over the commando killed him). The ice falls only while the lights are up: inside THE CAVE-IN it is the band's.
THE CAVE-IN	9 s · 50 % dark	13 s · 40 % dark	16 s · 30 % dark	18 s · 25 % dark	ACT II, under 60 % of his bar: he runs for the mouth, the lights go down, and a BAND of falling ice walks the floor from x 1780 to 40 px outside the toy box's ring in 9 · 13 · 16 · 18 s: rows 64 px apart, 8 seats a row down the floor, a share of the seats left dark (50 % · 40 % · 30 % · 25 %: the gaps a man can stand in), each shadow the storm's 1.8 s tell and the same kill (measured: a band shard KO'd a rifleman 1.817 s after its shadow). The lights come up at GATE TWO (THE LAST MARCH: his two swordsmen burst out beside him) and the hunt resumes.
THE RAVAGE	—	—	under 26 %	under 26 %	HARD and MEGA only, between the cave-in and the chase: his charges down the hole columns (from the top holes down) and the sweep from the mouth to the back hole, with the swarm (2 · 3 · 5 · 7 cave yetis on the rail); his contact on the run is THE CHASE's (2 bar hits). Not staged on this page: the read's cells.
THE CHASE	210 px/s	165 px/s	190 px/s	210 px/s	ACT III, under 25 % of his bar: out of the mouth and on the floor for good, running at a man at 140 · 165 · 190 · 210 px/s; every man within 40 px takes **2 bar hits × the share** and a bowl-over every 0.5 s he stays under him (measured on every man and hero; King Yeti and King Rex turn it). Every 6 s a roar calls the raiders to the toy box and the swordsmen out. The run is the only time his bar is on the floor to shoot the whole way.
THE GATES	60 % · 25 %	60 % · 25 %	60 % · 26 % · 25 %	60 % · 26 % · 25 %	On his bar: THE CAVE-IN under 60 %; on HARD and MEGA THE RAVAGE under 26 %; THE CHASE under 25 %. Act II's strikes call the cave yetis (2 a wake) and the swordsmen with every strike (Act I: every second).

No rung price in the caves. A party grows it ×(1 + 0.9 a commander past the first), measured as born: the table below.
THE HOLES	7	7	7	7	Three in the top wall, three in the bottom, and THE BACK HOLE behind your line (x 236, y 214: 130 is the toy box's x). A cave yeti takes the back hole one trip in four; the boss every third strike. The far mouth (x 1840) is his door alone.
THE TOY BOX	−8 lives if he crosses it	−8 lives if he crosses it	−8 lives if he crosses it	−8 lives if he crosses it	He never marches the box in the hunt: his legs run at your men. The cave yetis do (THE RAIDERS after the first minute, the roar's callers in THE CHASE): a bite costs 1 life.

6. **12 s** · 2 spearmen out of the holes (720, 62), (720, 660)

7. **17.5 s** · 2 fishers out of the holes (360, 62), (1080, 62)
8. **18 s** · 1 swordsman out of the holes (720, 62)
9. **25 s** · 1 THE FEROCIOUS YETI in the far mouth (bar ×4.77)

One wave on the clock: the holes field the cave yetis in five bursts, the spearmen, the fishers and the swordsmen at their premieres, and THE FEROCIOUS YETI shows in the far mouth at 25 s. On top of it all fight: his roar's wakes (2 cave yetis), his strikes' calls (the swordsmen), the cave swarm every 50 · 60 · 60 · 60 s, the raiders' rush every 40 · 30 · 30 · 30 s after the first minute, and the live caps (1–4 spearmen, 1–2 fishers, 1–3 swordsmen, 10 cave yetis; a party adds one).

How this was read and checked

The live client v29.45 (index.html md5 45c6dc2110aca9c45afcf11e69b2768d, HEAD's own copy) was opened headless on this Mac and read with the game's own functions: every table, every tier's sheet at the lab's own level, every man's HP and bar at every rank, his bar for 1 to 10 commanders, the lab's 35 cells for the caves. Then each blow was **measured on the real machines** in a BOSS LAB fight on every tier with the stock army worn (level 45 · 47 · 48 · 50), every cave creature born through the game's own door and the boss through his own spout row: a cave yeti's landing on eight men (and ten on the saber Sarge for his block), a spearman's charge on eight, a fisher's fish on eight, a swordsman's three cuts on a flame, a rifleman and a medic together and one cut on each of seven men, the saber Sarge (ten tries), the pistol and the Claymore Sarge, THE CHOMP on eight men, the pistol and the Claymore Sarge, the saber Sarge ten times, the jeep and the tank, and a rampage's lighter landing, the chase's run on eight, the stomp on eight, a falling shard over eight men, the pistol and the Claymore Sarge, the jeep and the tank, a band's shard, a commando twice (his shield, then his death) and the roof over a rifleman, the six heroes under all eight blows, every body as the tier bears it, and the boss born in a party of 2, 3 and 5. Chrome 381/381 · WebKit 381/381 checks passed, zero page errors, and the two engines read every number the same. The opening's own clock (the first cave yeti, the box bitten with nothing placed, the lab remembering ×4) is CARD-ICN's read of v28.96, on its page; since then the quiet start moved the first burst to 8 · 6 · 5 · 4 s by tier.
