

THE PILLOW FIELDS · EMPEROR BEAR · EVERY UNIT, EVERY DIFFICULTY

What every Snugg, cub, paratrooper, guard, Bluecoat, cannon, cavalryman and Emperor Bear does to your men on EASY, MEDIUM, HARD and MEGA, with every body's HP and head-count · read out of the live game v29.45 on Nov 2, 2026 21:40 EST · every damage number checked on the game's own machines (Chrome 333/333 · WebKit 333/333) · for Raziya

The one thing to know: in the Pillow Fields **every blow of the bears' bodies is a KO, whatever a man's HP**: the cub's pounce, the paratrooper's landing, a Bluecoat's sword, the hooves of the Emperor and his cavalry, and the Emperor's own sword (three cuts a lunge, three men down). **Sarge is no exception here**: under a moving horse any Sarge and Jane fall, and the Emperor's cut fells a saber Sarge without a block roll. Only three hits take part of a man, and since the damper each lands at 50 %: a Snugg's or a paratrooper's **glob (2 bar hits, so 1 × his share lands**; a man mends one for every 4 s left alone), a cotton cannon's lob (**half his bar, so a quarter of his bar lands**: five lobs 3.5 s apart), and a Bluecoat's cut on Sarge or a hero (**1 bar hit, so 0.5 lands**). Difficulty changes the bodies (×1 · 1.35 · 1.5 · 1.8), the head-counts (×1 · 1.25 · 1.5 · 1.5) and the lab's level; a hit is the same on every tier. MEGA brings nothing new to a hit: the +20 % and the double weather are the Ice Castle's law, not the fields'. The Emperor fights on **two bars** (1,240 · 1,653 · 2,478 · 6,339 each, solo at the lab's levels: the designers' time-to-kill chart's numbers, MEGA the player-damage-threshold pass's; the price of the player's rung no longer moves them, it still rides his Bluecoats, officer and cannons, and **a party pays the tier alone**: 2,358 · 3,147 · 4,712 · 12,042 with two commanders): one on the horse, one on foot.

THE BOSS LAB fights the Emperor with its stock army at **LEVEL 50 on EASY, 57 on MEDIUM, 63 on HARD and 70 on MEGA**: Sarge with the saber, the jeep, the tank, the dogfighter and the bomber, and seven men at that rank (rifleman, M. gunner, bazooka, mortar, medic, flame, sweeper). The radio man, the grenadier, the commando and the spy are a tap away in THE PLATOON. Every "level" number on this page is that army at that tier's level.

What changed recently (since Oct 29)

live since	when	card	what it does in this fight
v29.41	Nov 2 18:11	**CARD-DHP · THE BONUS DOUBLED, THE SHOTGUN'S HEALTH**	The bazooka's and the commando's tenth-rank HP bonus doubled (+5 more HP a tenth rank for the bazooka, +5 for the commando): at the lab's levels 50 · 57 · 63 · 70 the bazooka has 74 · 74 · 88 · 101 HP (was 49 · 49 · 58 · 66), the commando 83 · 83 · 96 · 110 (was 58 · 58 · 66 · 75). Shotgun Sarge +20 HP for every ten shotgun ranks while the shotgun is in his hands: 135 · 135 · 157 · 180 HP (was 35 · 35 · 37 · 40); his other irons as they were. A glob or a lob lands a hair lighter on them (the share); the KO strikes do not care.
v29.40	Nov 2 18:03	**CARD-FLT · THE FLAME'S RUNGS TRIPLED**	The flame's tenth-rank HP rungs through level 50 tripled: +60 HP at every lab level, 121 · 121 · 130 · 140 (was 61 · 61 · 70 · 80); every other man as he was.

live since	when	card	what it does in this fight
v29.37	Nov 2 16:49	**CARD-RXT · THE TIME-TO-KILL CHART**	The designers' time-to-kill chart sets the Emperor's bar for one commander on EASY, MEDIUM and HARD: 1,240 · 1,654 · 2,481 at rung 50 or under, 1,240 · 1,653 · 2,478 at the lab's levels 50 · 57 · 63 (was 152 · 233 · 287 at the lab's levels, 152 · 205 · 228 at rung 50 or under). The price of the player's rung no longer moves his bar (the player-damage-threshold pass cancelled it first at v29.30, its multiplier figured over the priced bar; the chart wrote its own numbers over that at v29.37), so the price cancels and the lab's level lands 0 to 3 HP under the chart's number. The cavalryman's bar rides the same multiplier: 514 · 605 · 820 (was 63 · 85 · 95). A party of two: 2,358 · 3,147 · 4,712 (was 289 · 390 · 433). MEGA keeps the player-damage-threshold pass's table (the row below).
v29.30	Nov 2 15:45	**CARD-PDT · THE PLAYER DAMAGE THRESHOLD**	The pass writes the boss's bar for one commander into his row's multiplier at four decimals, figured over the solo bar with the rung's price in it: the price cancels on the Emperor's bar and stays on his Bluecoats, officer and cannons; the cavalryman's boss-typed row takes the same multiplier, so a solo player's price now LOWERS his bar (605 at the lab's level 57 against 687 at rung 50 or under on MEDIUM) while a party's rows carry no price. On MEGA the Emperor's bar is the pass's table: 6,345 at rung 50 or under, 6,339 at the lab's level 70 (was 390 at the lab's level, 274 at rung 50 or under); the cavalryman 1,845 (was 113); a party of two 12,042 (was 520). The chart (the row above) took EASY, MEDIUM and HARD from this table the same day.
v29.17	Nov 1 23:52	**CARD-DMP · THE DAMPER**	Every enemy blow on your men lands at 50 % in the campaign and the boss fights (the damper takes 50 % off on EASY, MEDIUM, HARD and MEGA alike). Here a glob lands 0.93 of a level-50 rifleman's 7 bar hits (it was 1.85), a lob a quarter of his bar (five lobs to a KO), a Bluecoat's cut or the saddle swing on Sarge or a hero, and the hooves on a hero, 0.5 bar hit (× his share on Sarge): a man stands twice the blows he did. A KO is not dampened: the pounce, the landing, the swords and the hooves on a man land as shipped.
v28.93	Oct 31 22:56	**CARD-KCF · KING CROAK**	King Croak the hero is tougher on every rank: 201 HP and 165 bar hits at level 50 (the heroes' table). Every blow lands on him as on any hero.
v28.74	Oct 31 00:11	**CARD-HP3 · THE HEAVIES**	+3 HP every tenth rank for the bazooka, grenadier, flame and commando. A glob or a lob lands a hair lighter on them (the share); the KO strikes do not care.
v28.68	Oct 30 23:31	**CARD-BRB · THE BOMBER**	Your bomber flies in every boss fight now, the Pillow Fields included, and aims at the thickest knot of plush (or the Emperor).
v28.65	Oct 30 19:39	**CARD-LRB · ONE HP NUMBER**	Your man's HP is the number on his unit sheet. A glob, a lob and a Bluecoat's cut on Sarge still count in bar hits, but land a little lighter on tough men: 90 % + 10 % × bar ÷ HP (a level-50 flame takes 1.81 of a glob's 2, a rifleman 1.85, before the damper).
v28.46	Oct 30 12:57	**CARD-BLP · THE BOSS LAB'S STOCK ARMY**	The lab fights the Emperor with its own army at LEVEL 50 · 57 · 63 · 70 (the lab's level sheet for the fields reads 50–70, spread over the four tiers): the one this page reads. Past rung 50 that level's price rode his bars until the player-damage-threshold pass (v29.30; the chart then wrote its own numbers over it at v29.37); today it rides his Bluecoats, officer and cannons (×1 · 1.136 · 1.257 · 1.422) and lowers the cavalryman's bar.
read	Oct 10	**CARD-BHP · ONE BOSS, MORE HEALTH**	A party does not multiply the Emperor: it grows his bars (×1 + 0.9 a commander past the first); the cavalry's bar grows the same way (the table below).
—	—	**UNCHANGED SINCE THEN**	The plush's hits, the Bluecoats' blade, the cotton cannon's half-bar lob (CARD 0902, Sep 2), the hooves that fell Sarge and Jane (0829 / 0904, Sep 3–5), the hunt on foot (0904), the royal funnel and the battery (0902), the wave sheets. The stone wall and the reflect are switched off (0904). The versions' dates above are the game's own git log (checked on the Big Mac, Nov 2); the older dates come from the client's own comments.

How a hit is counted

Your men carry **HP**: the number on their unit sheet (a level-50 flame has 121, a rifleman 26; at level 70: 140 and 33). Their health bar is also cut into a few **bar hits** (7 for most men at these levels, 6 for the medic and spy, 8 for the commando, 12 for the saber Sarge). Three kinds of hit in this fight:

- **KO hits** (the cub's pounce, the paratrooper's landing, a Bluecoat's cut on a man, the hooves, the Emperor's sword and saddle swing): out in one hit whatever his HP.
- **Bar hits** (a glob: 2; a Bluecoat's cut on Sarge or a hero: 1; the Emperor's or the cavalry's blow on a hero: 1): since v28.65 a bar hit lands 90 % + 10 % × bar ÷ HP, and the damper lets 50 % of that land, so a level-50 rifleman takes 0.93 of his 7 from a glob (3.4 HP of 26). A man who takes no hit for 4 s mends one bar hit, and again every 4 s.
- **The cotton lob**: half the man's bar × that share × the damper, so 1.62 of a level-50 rifleman's 7: five lobs 3.5 s apart KO every man (four KO a hero, whose share is 1); the jeep and the tank take one hull hit a lob (a hull hit is not dampened).
- **THE DAMPER** (since v29.17): in the campaign and the boss fights every blow an enemy lands on your men, Sarge or a hero lands at **50 %** (the game takes 50 % off on EASY, MEDIUM, HARD and MEGA alike, read in each tier's lab fight), so a man stands twice the globs, lobs and cuts he did; a KO is not dampened, it lands as shipped.

Saves still roll on every hit: a jetting, dropping or dragged man cannot be touched, the pet shield, the deflect dome, the absorbs, and **the saber Sarge's block turns a glob, a lob, a pounce or a Bluecoat's cut 50 % of the time** (measured: 19, 26, 21, 17 of 40 pounces turned on the four tiers on Chrome, 15, 18, 23, 21 on WebKit: 15–26 of 40, a coin's spread about 20). **It never turns the Emperor's cut or a moving horse**: those come already rolled (measured 10 KO of 10 cuts, 0 blocks; every Sarge and Jane under the hooves on every tier). The Claymore Sarge's counted block and the riot plate keep their say. A Bluecoat whose man is a saber Sarge mid-charge waits for the strike to land, then cuts.

The strikes · what a hit does by difficulty

hit	EASY	MEDIUM	HARD	MEGA	who it hits	since
THE CUB'S POUNCE	**KO**	**KO**	**KO**	**KO**	the man he hops on, then the next within 150 px	unchanged
THE SNUGG'S GLOB · bar hits	**2 × 0.5 × share**	**2 × 0.5 × share**	**2 × 0.5 × share**	**2 × 0.5 × share**	one man within 280 px, every 3.6 s	v29.17: × the damper (v28.65: lands 90 % + 10 % × bar ÷ HP of that)
THE PARATROOPER'S THUMP	**KO**	**KO**	**KO**	**KO**	every man within 76 px of his landing (the shadow sways up to 9 px)	unchanged
THE PARATROOPER'S GLOB · bar hits	**2 × 0.5 × share**	**2 × 0.5 × share**	**2 × 0.5 × share**	**2 × 0.5 × share**	one man within 230 px, every 2.6 s	v29.17: × the damper
A BLUECOAT'S CUT	**KO**	**KO**	**KO**	**KO**	the nearest man within 74 px of each cut, three cuts a lunge	unchanged
A BLUECOAT'S CUT · Sarge, a hero	**1 × 0.5 × share**	**1 × 0.5 × share**	**1 × 0.5 × share**	**1 × 0.5 × share**	a bar hit through his saves (the saber turns half)	v29.17: × the damper
THE COTTON LOB · bar hits	**½ bar × 0.5 × share**	**½ bar × 0.5 × share**	**½ bar × 0.5 × share**	**½ bar × 0.5 × share**	every man within 50 px of the burst; the jeep: a hull hit (a hull hit is not dampened)	v29.17: × the damper
THE HOOVES (Emperor · cavalry)	**KO**	**KO**	**KO**	**KO**	a man within 52 px of a moving horse; Sarge and Jane fall; a hero 0.5 bar hit + the throw a pass (the Emperor's hooves land it every pass, the cavalry never a hero's last)	v29.17: a hero's blow × the damper
THE EMPEROR'S SADDLE SWING (at rest)	**KO**	**KO**	**KO**	**KO**	a man within 52 px every 0.6 s; a Sarge with a blade in hand: 1 bar hit × 0.5 × his share and keeps his feet; a gun Sarge, a hero: the same blow + thrown 135–185 px (the pistol Sarge 180–185, King Rex 135; measured)	v29.17: Sarge's and a hero's blow × the damper
THE EMPEROR'S SWORD	**KO**	**KO**	**KO**	**KO**	three cuts a lunge, each the nearest uncut man within 74 px; Sarge: the block never rolls	unchanged
BODY HP · the plush	**×1**	**×1.35**	**×1.5**	**×1.8**	the guards, Snuggs, paratroopers, cubs and cavalry: the tier alone	unchanged

hit	EASY	MEDIUM	HARD	MEGA	who it hits	since
BODY HP · his Bluecoats, officer and cannons	**×1 × 1**	**×1.35 × 1.136**	**×1.5 × 1.257**	**×1.8 × 1.422**	the tier × THE PRICE of the player's rung past 50 (×1 · 1.136 · 1.257 · 1.422 solo at the lab's levels 50 · 57 · 63 · 70; ×1 in a party or at rung 50 or under): the funnel's bodies keep the price the Emperor's bar no longer carries	unchanged
HEAD-COUNTS	**×1**	**×1.25**	**×1.5**	**×1.5**	the Snuggs and the paratroopers; the guards, the cubs and the cavalry stay 4 · 3 · 3	unchanged
THE EMPEROR'S BAR (lab's level, one commander)	**1,240 × 2 lives**	**1,653 × 2 lives**	**2,478 × 2 lives**	**6,339 × 2 lives**	the designers' time-to-kill chart's bar for one commander on EASY, MEDIUM and HARD, the player-damage-threshold pass's table on MEGA (1,240 · 1,654 · 2,481 · 6,345 at rung 50 or under), written into his row's multiplier at four decimals over the priced solo bar: the price of the rung cancels, and the lab's levels 50 · 57 · 63 · 70 land 0 to 6 HP under the chart's number	v29.37 (the chart) · v29.30 (the pass: MEGA)
A CAVALRYMAN'S BAR (lab's level, one commander)	**514**	**605**	**820**	**1,845**	his row takes the Emperor's multiplier, so his bar rides the Emperor's; figured over the priced bar, a solo player's price LOWERS it: 514 · 687 · 1,032 · 2,626 at rung 50 or under	v29.37 (the chart) · v29.30 (the pass)

share = 90 % + 10 % × the man's bar hits ÷ his HP (CARD-LRB); × 0.5 = THE DAMPER (CARD-DMP): what lands of an enemy's blow on your men, read in each tier's lab fight. The fields' dials sit in THE BOSS LAB's RULES under THE PILLOW FIELDS: a typed cell is what the next lab fight uses.

Who survives · the lab's levels 50 · 57 · 63 · 70

How many of that hit in a row KO a fresh man at the tier's own level. **KO** = one hit. Hover a cell for the numbers.

KO one hit · 2 two · 3 three · 4 four · 5+ five or more · a dot in the corner = measured on the game's own machine in this read · ½ = the saber turns half

GLOBS: by the sum of the hits; a Snugg's globs come 3.58–4.17 s apart and a man mends one bar hit for every 4 s he is left alone, and since the damper a glob lands less than one bar hit, so every mend undoes about a whole glob: a lone Snugg needs more than the sum (measured 8–19 globs on 7-bar men over 40 runs on both engines, 8 by the sum; 122 of the 459 gaps passed the 4 s mend, 1 run needed 19). The paratrooper's globs come 2.58–3.17 s apart, inside the mend. LOBS: 3.5 s apart, inside the mend. BLUECOAT'S CUT on Sarge: 1 bar hit × the damper's 50 % through his saves. * The Claymore Sarge's own block can eat a KO whole (not measured here).

The heroes at the lab's level (one in command), measured

hero	HP (E · M · H · G)	bar hits	pounce · thump	a glob	a cotton lob	the cavalry's hooves	the Emperor's sword

PRINCESS CROAK	**82 · 83 · 90 · 97**	65 · 65 · 71 · 77	KO	1 · 1 · 1 · 1 bar hits	16.25 · 16.25 · 17.75 · 19.25 of 65 · 65 · 71 · 77 (a quarter)	0.5 bar hit + thrown 157–159 px a pass	KO

A hero's share is 1 (his HP is not on the unit sheet), so a glob lands the whole 2 × the damper's 50 % = 1 and a lob exactly a quarter of his bar: four lobs KO any hero. Jane falls under a moving horse like Sarge; the other heroes take 0.5 bar hit and are thrown a pass. The cavalry never take a hero's last blow; **the Emperor's hooves do**: a hero one blow from the KO falls under his charge (measured KING REX on every tier). The

Emperor's sword KOs every hero (measured on every tier).

The level a man first survives

For the hits that take part of a man. The KO hits have no such level: no rank survives them. **Green** = he already does at the lab's EASY level 50; — = not even at rank 100. Every blow lands at 50 % (the damper), so the counts in a row are twice those before it.

SARGE · CLAYMORE	68 / 23	78 / 24	0	0	0	0	0	0	—	0	0	0

Read from the game's own HP and bar ladders at every rank 0–100 (the tenth-rank extras included; no gifts, soul or gear), by the sum of the hits with no mend between. Sarge's rows read the iron at the same rank. Five lobs never: half the bar × the damper's 50 % × a share of 90 % or more lands at least 1.125 bars in five.

The units

HP = each body as the fields' own wave groups bear it on that tier (measured in this read: the plush are the tier alone). The Bluecoats, the officer and the cannons come through the Emperor's funnel at ×1.5 (Bluecoat) and ×2.5 (cannon) **× the price of the player's rung past 50** (the funnel's bodies keep the price the Emperor's bar no longer carries): the HP columns are the lab's SOLO bodies at level 50 · 57 · 63 · 70 (×1 · 1.136 · 1.257 · 1.422); a party, or a player at rung 50 or under, meets a Bluecoat of 12 · 17 · 18 · 21, an officer of 24 · 32 · 36 · 43 and a cannon of 25 · 35 · 38 · 45 HP (measured on both engines); at rung 100 solo the price is ×2.167. n = bodies named in the solo wave sheet (one commander); ∞ = as many as the funnel brings while he lives. leak = lives it costs at the toy box. tags = dog tags paid when it falls.

Emperor Bear, move by move

move	EASY	MEDIUM	HARD	MEGA	how it works
THE RIDE	140 px/s	140 px/s	140 px/s	140 px/s	He walks on at the east rim and mounts at once (no court, no speech): the battery of 2 cotton cannons is born a screen and a half in (x 1500), the first pyramid bursts, the horn. Every leg he rides AT a man picked at random east of x 300 (never the toy box), a horse-length short of him, re-aimed as the man moves.

move	EASY	MEDIUM	HARD	MEGA	how it works
THE HOOVES	**KO**	**KO**	**KO**	**KO**	Every man within 52 px of the moving horse is trampled, once every 0.6 s each: a KO. **Any Sarge (every class) and Jane fall** under a moving horse in the Pillow Fields: the blade's block never rolls. Another hero takes 0.5 bar hit (1 × the damper's 50 %) and is thrown 203–208 px a pass (measured on both engines, every tier; EASY on Chrome: the rifleman KO · the flame KO · the bazooka KO · the medic KO · Sarge KO · Jane KO · King Rex 0.5 bar hit + thrown 204 px · the machine gunner KO), **and under the Emperor every pass counts**: a hero one blow from the KO falls (measured KING REX at 104.5 of 105 bar hits: KO under the Emperor's charge on every tier; under a cavalryman's charge he stands untouched, thrown 159 px: the cavalry never take a hero's last). The jeep and the tank ride through untouched.
THE CHARGE	420 px/s	420 px/s	420 px/s	420 px/s	Every 2nd–3rd leg (every 1st–2nd when the rung's price stamped on a solo fight is ×1.5 or more: the price no longer moves his bar, but it still sets his temper and his army's bodies): he rears 0.9 s on the spot (the dust ring, the horn, a red ring on his quarry), then runs the man down at 420 px/s and 120 px past him, the hooves landing on everyone in the way. At 70 % and 35 % of his bar the next leg is a charge now.
THE SADDLE SWING	**KO**	**KO**	**KO**	**KO**	At rest between legs he swings at whoever stands within 52 px: a man is KO'd (measured at 40 px). **A Sarge with a blade in hand** (the saber, the Claymore) takes 1 bar hit × the damper's 50 % × his share and keeps his feet (measured: the saber Sarge 0.47 bar hit, moved 11 px; his block turned the swing on 4 of 8 runs). **A gun Sarge and every hero take the same blow AND the sideways throw** (measured: the pistol Sarge 0.47 bar hit, thrown 185 px; KING REX 0.5 bar hit, thrown 135 px; on every tier, both engines).
THE ROYAL FUNNEL	every 9–14 s	every 9–14 s	every 9–14 s	every 9–14 s	While he rides, 5 s in and then every 9–14 s a detail of 2 Bluecoats walks on from the east rim on his lane (measured 12 · 19 · 23 · 30 HP each at the lab's four levels: the Bluecoat's body ×1.5 × the price of the rung; a party meets 12 · 17 · 18 · 21), in a column behind THE OFFICER (24 · 36 · 45 · 61 HP; a party 24 · 32 · 36 · 43), who comes with the first detail and whenever none stands. Every third detail is a battalion: 4 Bluecoats behind a flagged leader, and a fresh cannon if his battery is short (measured). The next detail waits while more than 6 Bluecoats stand.
THE KEEL	life 1 → 2	life 1 → 2	life 1 → 2	life 1 → 2	At 0 on the horse he is not felled (**measured through the game's own door on every tier**): the rocker keels 0.8 s (nothing lands on him), EN GARDE! in his window, the horn, the second pyramid bursts, and he rises on foot with a **second full bar**, the same number as the first (1240 · 1653 · 2478 · 6339). The EN GARDE! wave walks on at the keel (released 0.4–1.4 s after it, measured): 4 · 5 · 6 · 6 Snuggs, 3 cubs and the 3 cavalrymen (bar 514 each on EASY).
THE HUNT ON FOOT	190 px/s	190 px/s	190 px/s	190 px/s	He runs at a man picked at random east of x 300 (never west of it, never over the water: he crosses at the planks), stops at the sword's reach (74 px) and strikes; a man who falls or leaves is re-picked at once. Measured: a rifleman 150 px off is reached and KO'd in 0.433 s.
THE LUNGE · THREE CUTS	**KO** × 3 men	**KO** × 3 men	**KO** × 3 men	**KO** × 3 men	A pick within 330 px on his bank: a 0.05 s wind-up (the sabre back over his shoulder, a steel ring at his feet), a flight at 680 px/s to a pace short of him, then **three cuts 0.22 s apart**, each the nearest man not yet cut within 74 px in front: a KO each (measured: three men in reach, 3 KO'd; a rifleman 300 px off KO'd 0.633 s after the clock was ready). The clock is 4.5 s; once in reach he strikes 0.8 s into it. A saber Sarge in reach is KO'd: **the blade's block never rolls on a king's cut** (measured 10 of 10); every hero the same (measured, all six).
MEN WITHOUT FEAR	every 8–15 s	every 8–15 s	every 8–15 s	every 8–15 s	While he stands, every 8–15 s a wave of 3 Bluecoats (at most 12 on the field) and 2 cotton cannons walks on from the east (the cannons born at x 1660); the next wave waits while more than 4 of the last stand. At 75 % of his second bar a wave comes now. **THE FINAL PHASE** (the second bar at or under half): every 6–10 s and no waiting (measured).

move	EASY	MEDIUM	HARD	MEGA	how it works
THE GATES	70 · 35 % / 75 · 50 · 25 %	70 · 35 % / 75 · 50 · 25 %	70 · 35 % / 75 · 50 · 25 %	70 · 35 % / 75 · 50 · 25 %	On the horse: at 70 % and 35 % a charge now. On foot: at 75 % a wave now, at 50 % the stone wall (OFF today), at 25 % a lunge now.
THE STONE WALL · THE REFLECT	off	off	off	off	Both switches are off in the client today (the stone wall off, the reflect off): he neither braces against your rounds nor catches rockets and mortar bombs.
HIS BARS (one commander, the lab's level)	**1,240** twice	**1,653** twice	**2,478** twice	**6,339** twice	The designers' time-to-kill chart's number for one commander on EASY, MEDIUM and HARD (1,240 · 1,654 · 2,481 at rung 50 or under) and the player-damage-threshold pass's table on MEGA (6,345), each landed at the lab's level 0 to 6 HP under it: the pass writes the bar into his row's multiplier at four decimals over the priced solo bar, so the price of the rung (below) cancels — two full bars, one after the other. With more commanders both grow (the table below). His fall ends the fight; the Bluecoats and the cannons run for the rim, the plush go home.
THE PRICE OF THE RUNG	×1	×1.136	×1.257	×1.422	Solo, a player past campaign rung 50 is priced like a boss of his own rung (the lab's stock army is level 50 · 57 · 63 · 70, so the lab pays ×1 · 1.136 · 1.257 · 1.422); the ladder: rung 50 ×1 · rung 60 ×1.196 · rung 70 ×1.422 · rung 80 ×1.678 · rung 90 ×1.937 · rung 100 ×2.167, capped ×4. **Since the player-damage-threshold pass (v29.30) the price no longer moves the Emperor's bar**: his multiplier is figured over the priced bar, so it cancels (1,653 at level 57 against 1,654 at rung 50 or under on MEDIUM). **It still rides his Bluecoats, his officer and his cannons** (the units table), **and it LOWERS a cavalryman's bar**, the same multiplier over the Emperor's priced bar (605 at level 57, 687 at rung 50 or under on MEDIUM). **A party pays the tier alone** (the table below).
THE TOY BOX	–8 lives if he reaches it	–8 lives if he reaches it	–8 lives if he reaches it	–8 lives if he reaches it	He never marches the box: his legs run at your men. A cavalryman leaks 6, a Bluecoat, an officer, a guard or a cannon 2, a Snugg, a paratrooper or a cub 1.

His bars by the number of commanders (the Emperor, each of his two bars · a cavalryman)

	1 commander	2 commanders	3 commanders	4 commanders	5 commanders	10 commanders
EASY a real party (the tier alone)	1,240 · cavalry 514	2,358[m] · cavalry 979	3,475[m] · cavalry 1,439	4,585 · cavalry 1,904	5,702[m] · cavalry 2,364	11,282 · cavalry 4,679
EASY · THE BOSS LAB's party slider (a solo fight with a party's bar, its multiplier figured through the price ×1: the same as a real party's: the price is ×1)	1,240	2,358	3,475	4,585	5,702	11,282
MEDIUM a real party (the tier alone)	1,653 · cavalry 605	3,147[m] · cavalry 1,302	4,639[m] · cavalry 1,922	6,124 · cavalry 2,537	7,616[m] · cavalry 3,156	15,064 · cavalry 6,245
MEDIUM · THE BOSS LAB's party slider (a solo fight with a party's bar, its multiplier figured through the price ×1.136: 2–8 HP under a real party's)	1,653	3,145	4,637	6,121	7,613	15,056
HARD a real party (the tier alone)	2,478 · cavalry 820	4,712[m] · cavalry 1,952	6,942[m] · cavalry 2,879	9,184 · cavalry 3,806	11,415[m] · cavalry 4,733	22,579 · cavalry 9,356
HARD · THE BOSS LAB's party slider (a solo fight with a party's bar, its multiplier figured through the price ×1.257: 7–31 HP under a real party's)	2,478	4,705	6,933	9,171	11,399	22,548
MEGA a real party (the tier alone)	6,339 · cavalry 1,845	12,042[m] · cavalry 4,988	17,738[m] · cavalry 7,350	23,435 · cavalry 9,712	29,155[m] · cavalry 12,074	57,661 · cavalry 23,898
MEGA · THE BOSS LAB's party slider (a solo fight with a party's bar, its multiplier figured through the price ×1.422: 12–55 HP under a real party's)	6,339	12,030	17,721	23,412	29,127	57,606

A real party pays the tier alone: the price of the rung is ×1 while a party launches (the game's twin-sim law: every commander's sim builds the same army from the tier), so from 2 commanders up each of his two bars is the tier's base grown 1 + 0.9 a commander past the first under the chart's multiplier, read from the game's own sheet with the party flag set (2,358 · 3,147 · 4,712 · 12,042 with two); [m] = the Emperor born in a party of that size was measured at exactly this bar on every tier, both engines. One commander is a solo fight: his bar is the chart's number as the game lands it at the lab's level (0 to 6 HP under it), the price of that level cancelled inside the multiplier. THE BOSS LAB's own party slider (the second line) is a solo fight with a party's bar, its multiplier figured through the price, so from MEDIUM up it reads 2–55 HP under what a real party meets (it read higher before the player-damage-threshold pass (v29.30)). Each of his two bars is this number. A cavalryman's bar rides the Emperor's multiplier: a solo player's price lowers it (514 · 687 · 1,032 · 2,626 at rung 50 or under), a party's rows carry none (979 · 1,302 · 1,952 · 4,988 with two).

The cavalry's hooves on a line of eight, measured (DUKE BEAR's brain: the prance, then the charge through the line)

EASY · 18 bodies + the funnel

1. **EMPEROR BEAR TAKES THE FIELD** (ON THE CLOCK)
   4 honor guards, 2 Snuggs, 2 paratroopers, 3 cubs · then EMPEROR BEAR (bar 1,240 × 2) at 3 s
2. **EN GARDE!** (HOLDS WHILE THE EMPEROR IS ON HIS HORSE)
   4 Snuggs, 3 cubs, 3 CAVALRYMEN

MEDIUM · 21 bodies + the funnel

1. **EMPEROR BEAR TAKES THE FIELD** (ON THE CLOCK)
   4 honor guards, 3 Snuggs, 3 paratroopers, 3 cubs · then EMPEROR BEAR (bar 1,653 × 2) at 3 s
2. **EN GARDE!** (HOLDS WHILE THE EMPEROR IS ON HIS HORSE)
   5 Snuggs, 3 cubs, 3 CAVALRYMEN

HARD · 22 bodies + the funnel

1. **EMPEROR BEAR TAKES THE FIELD** (ON THE CLOCK)
   4 honor guards, 3 Snuggs, 3 paratroopers, 3 cubs · then EMPEROR BEAR (bar 2,478 × 2) at 3 s
2. **EN GARDE!** (HOLDS WHILE THE EMPEROR IS ON HIS HORSE)
   6 Snuggs, 3 cubs, 3 CAVALRYMEN

MEGA · 22 bodies + the funnel

1. **EMPEROR BEAR TAKES THE FIELD** (ON THE CLOCK)
   4 honor guards, 3 Snuggs, 3 paratroopers, 3 cubs · then EMPEROR BEAR (bar 6,339 × 2) at 3 s
2. **EN GARDE!** (HOLDS WHILE THE EMPEROR IS ON HIS HORSE)
   6 Snuggs, 3 cubs, 3 CAVALRYMEN

The opening runs on the clock (the guards 1.6 s in, the Emperor at 3.0 s, the Snuggs 4.6 s, the paratroopers 5.4 s, the cubs 5.8 s). EN GARDE! waits for the keel: the Emperor's first bar at 0. On top of both: the battery at the ride's start, a Bluecoat detail every 9–14 s while he rides, a wave of Bluecoats and cannons every 8–15 s while he stands.

How this was read and checked

The live client v29.45 (index.html md5 45c6dc2110aca9c45afcf11e69b2768d) was opened headless on this Mac and read with the game's own functions: every table, every tier's wave sheet at the lab's own level, every man's HP and bar at every rank, the Emperor's and the cavalry's bars for 1 to 10 commanders, the price ladder. Then each hit was **measured on the real machines** in a BOSS LAB fight on every tier with the stock army worn (level 50 · 57 · 63 · 70), every plush born through the fields' own wave rows and the

Emperor's own doors (the ride, the keel, the funnel, the battery): the cub's pounce on seven men (and 40 on the saber Sarge for his block), an honor guard beside a rifleman, a Snugg's and a paratrooper's glob to the KO, a Bluecoat's and the officer's dash-slash on men and on the saber Sarge (10 and 6 tries), the officer's whistle, the paratrooper's landing on eight men at 0–250 px (the reach 76 px from the landing point), a king's cannon on seven men and the jeep, the cavalry's charge through a line of eight, the Emperor's charge through the same line, his saddle swing on a rifleman, a saber Sarge, a pistol Sarge and King Rex, his battery, his first detail and a battalion, his three cuts on three men, the lunge from 300 px, the walk-in from 150 px, his cut on the saber Sarge (10 tries) and on each hero, MEN WITHOUT FEAR's wave and the final phase, the six heroes against the pounce, the glob, the lob and the hooves, King Rex one blow from the KO under a cavalryman's charge and under the Emperor's, every body as the tier bears it, the funnel's bodies at a party's price, the Emperor born in a party of 2, 3 and 5, and the keel through the game's own door (the snap, the second bar, EN GARDE!, the second pyramid, the EN GARDE! wave's release), with THE DAMPER read in each tier's fight (50 % of every blow lands) and in every landed blow above. Chrome 333/333 · WebKit 333/333 checks passed, zero page errors, and the two engines read every number the same.
